Re: Arc-fault Breaker Tripping

To whom it may concern,

We are experiencing issues with arc-fault breakers tripping where large appliances like refrigerators, freezers, washers and dryers are being used in our home.

Specifically we are dealing with\_\_\_\_\_. We have had several visits from the builder and electrician that installed the arc-fault breakers to try and fix the issue with little success.

Please consider amending the arc-fault requirement where refrigerators and freezers are concerned.

Sincerely,

\_\_\_\_\_
